Don't waste water!

There are 7 billion people on the planet and we need more water than before. 1.1 billion people don't have access to fresh water. Others only have access for part of the year. Pollution from factories and chemicals makes water dirty. Also, climate change means that there is less water now. It rains less, or rain falls at different times. The rain doesn't fill rivers and reservoirs. If there is no clean water, people drink dirty water instead. This causes illnesses and a lot of people, especially children, die because of this. What can we do? If you live in a country with lots of fresh water, you are very lucky! But you can still help to save your country's water.

- Turn off the tap when you are brushing your teeth.
- Don't use fresh water to water your lawn.
- Don't have a bath. Have a shower instead.
- Eat less meat. The meat industry uses a lot of water.

Water is precious! Don't waste it.
